

Cut & Multi Loop Tufting Machine

STEPPING MOTOR YARN FEEDING SYSTEM

●SPECIFICATIONS :

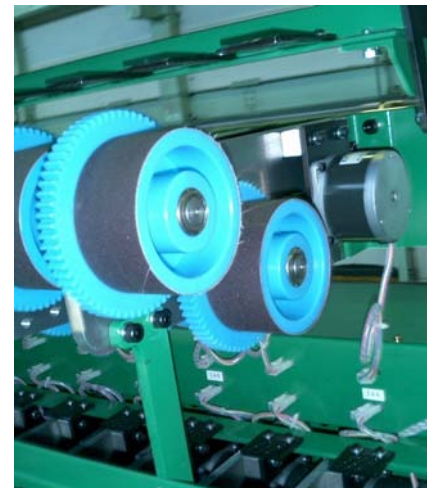

- Working Width : Max. 5000 mm
- Number of Rolls : 120 rolls ,144 Rolls ,etc...
- Number of Gauge : 5/32",1/8" and 1/10"
- Stitch : 6 ~15 st./inch
- Cut Pile Height : HIGH CUT 6~15 mm
- Loop Pile Height : MULTI LOOP 3~13 mm
- Production Speed : Max. 650 RPM
- Design Repeat : Number of Rolls×Number of Gauges

LOOPER & SPRING

144 Rolls Stepping Motor With PCL Tufting Machine

Stepping Motor

The Newest Technology!!

Comparing to the conventional system, this new Tufting machine is able to make up to 64 different loop pile height, so called MULTI-LOOP, thanks to the accomplished yarn feeding system driven by Stepping Motor.

Moreover, equipped with our patented PCL attachment, the good combination of Multi-Loop and Hi-Cut pile, at will, creates the novel and 3-dimensional carpet design.

Feature:

- 1) 64 level of the yarn feeding
- 2) Function of the Gradation
- 3) Sharpness of the Design
- 4) Simplicity of the maintenance

NEW TECHNOLOGY

MULTI LOOP by STEPPING TUFTING MACHINE

Yarn Feeding Device STEPPING SYSTEM

Number of Rolls : 120rolls, 144rolls, 240rolls, ...
Number of Gauges : 1 / 1 0"GG. 1 / 8"GG. 5 / 3 2"GG. ...
Design Repeat : Number of Rolls x Number of Gauges

*120 Rolls Servo
1 / 8" GG Loop Carpet*

*Working Needles Width 170 inches 120 Rolls Servo
Tufting Machine*

Feature :

- 1) 64 level of the yarn feeding
- 2) Function of the Gradation
- 3) Sharpness of the Design
- 4) Simplicity of the Maintenance

The Newest Technology

Compare to the conventional high & low Tufting Machine, it is able to make 64 height level loop for the each yarn , easier to make the texture image more solid than the former two dimensional carpet surface by our new & high technology.

- ① The yarn feeding control by servo motor
- ② Our original design systems
- ③ Simple use, Easy maintenance

*Working Needles width 170 inches
120 Roll Servo*
